

How to Choose Bathroom Theme Accessories

If you feel like countless other folks who consider their bathroom to be nothing more than a shiny glare of fixtures and tile, try re-thinking how your bathroom can be. It is not that difficult to do, since all you need is your imagination to figure how you want it to look and feel. Here are a few design tips on bathroom theme accessories that will warm up the bathroom in no time. Bathrooms, like every other room in a house, should be themed because it gives the space a mood and adds your personality to your little corner of the world. It is where you can say, by design, what is most important to you. There are hundreds of design themes to pick from, including country, dolls, sea life or even villas on the Mediterranean. The choice is yours, so choose the theme that you want. It is a good idea to pick a theme that matches, or at least correlates with other design styles in your home. That way, it will not be too busy, or out of tune with other areas of the house. If you have a bathroom that small, you are not out of sync with others since bathrooms in older homes were literally carved out of small closets. Even if you are one of the unfortunate ones that do have a tiny bathroom, you can still decorate for color. Remember though, that with small bathrooms, less is often better. Your color scheme can be paint or wallpaper, but if the space is small, a neutral paint or paper color can be used on either one wall, or as an accent on a chair rail. You can choose to paint a traditional white, and accent with color using various decorating accessories such as framed prints, shells, baskets, rug throws, and window treatments to name but a few.. Warm rust tone of paint or paper work very well with plants in the bathroom, but choose plants that like steamy warm conditions, and that can tolerate the different chemicals. Some plants just cannot take the mousse, hairspray, and perfumes that are regularly used in a bathroom. It will gum up the plants on the leaves and they will end up in your trashcan. If your bathroom is large enough, you can hang plants from the ceiling, or put them on the back of the toilet. Large garden style tubs have ample space on the rim of the tub to place tiny planets, and with bath soaps and baskets, they look lovely. Towels and rugs are important when decorating your bathroom. Deep plush or hand woven rugs add a touch of elegance. However, be careful when placing rugs on slippery linoleum or tile because a nasty fall can be the result. Look for rugs that have a lined backing of rubber to prevent falls. You can coordinate the rugs with the bathroom mat in alternating or matching colors as well. Using different textures that match your theme will give the bathroom a little extra touch of warmth. Do not think you are limited on textures because when they are combined with a neutral backdrop, they make a bathroom homey and inviting to be in. Lighting is important in a bathroom as well. The first consideration is for safety of course, but when the room is not being used, nightlights can be left on and your cabinet tops could be used for a small lamp. Lamps can match your theme and so can your nightlights. You can decorate them, or buy them already fixed up with your theme. Of course, this all depends on if you have enough counter space, but it is a great decorating idea for a theme. Towel racks are another way to pizzazz up your bathroom. Decorative racks with colorful towels make a bathroom stand out. You can find towel racks in different shades of wood, bronze, silver or gold. Many folks paint their own wooden racks, and match their baskets and picture frames with them. Finally, take time and read a few decorating books on bathrooms. Look at their designs and see the many different ways to theme your bathroom. Use their designs for inspiration so your own creative juices will get flowing. It is okay to be uniquely you when decorating your bathroom, so go for it! You will never know what other themes take your fancy until you check them out when trying to decorate your bathroom at home.
